At home in the city

Mastering the everyday activities.

Clearing roads from snow and ice. Sweeping sidewalks and bicycle paths. Mulching on slopes and fighting weeds. Creating, mowing and watering parts and greens. Disposing of waste and refuse. Today, cities and municipalities are modern service centres. Your task is the care of the environment and the maintaining of the quality of life of the residents.

Flexible multitalent.

Multicar, a compact implement carrier and special transporter in one. Thanks to the powerful hydraulic variants and a practice-proven operating concept, a Multicar is a professional implement carrier for stationary and mobile application of implements. Thanks to its sophisticated design, it is also a powerful special transporter with high loading capacity. Every Multicar, whether FUMO, M 26 or TREMO Carrier, has its own strengths. Your Multicar partner near you will be pleased to help you make your selection.

More than 100 applications in 365 workdays.

A Multicar is on the move for you all year round, on roads, bicycle paths, in pedestrian areas and in the terrain. It is strong. Up to 2.7 t payload make transport easy. It is exact. With its drive variants, you use the more than 100 implements very precisely. It is flexible. Normally, one person changes the implements within a few minutes.

Room for man and machine

As sparing as a Multicar is with its external dimensions it is just the opposite with the space it provides: In the comfortable driver's cab, with its generous loading capacity and its three attachment areas at the front, top and rear.

Worth its price

In short: A Multicar is economical, powerful, quick and manoeuvrable. A profitable investment.

At home in the community

TREMO: 1.32 m wide

M 26: 1.59 m wide

FUMO: 1.62 m wide

Multicar. A class of its own.

- ✓ Compact and manoeuvrable
- ✓ Variable with off-road capabilities
- ✓ Sturdy and strong
- ✓ High payload
- ✓ Ergonomical and safe
- ✓ Modular with a long service life
- ✓ Economical and service-friendly

Show its teeth in winter

In snow and ice, the Multicar displays its real strengths. When ploughing through, when it keeps you in the track thanks to excellent traction. During snow cutting, when you steer it through the highest snow walls thanks to hydrostatic drive. During snow clearing and spreading when, thanks to its three attachment areas and powerful hydraulics, it does several things at once. During implement change when, thanks to its quickhitch system, you are back to the warm driver's cab already after a few minutes.

With a combination spreader on the skip loader body and a front-mounted sweeper, the M 26 masters winter tasks.

Even when it becomes cold outside, it is warm and comfortable in the modern space-frame cab of the FUMO.

The M 26 with universal hydraulics pushes itself through snow and ice.

The front and rear hydraulic connections of the FUMO drive implements with up to 300 bar.

TREMO Carrier: With hydrostatic drive for snow cutter use.

Clearing, cutting, spreading, sweeping

The FUMO Carrier H with its three-circuit, high pressure, comfort hydraulics and hydrostatic cuts through snow walls.

- Winter tips:**
- ✓ FUMO, the universal winter professional. Hydrostatic drive for continuous hydraulic crawler gear.
 - ✓ M 26, the winter road professional. Universal hydraulics for simultaneous snow clearing and spreading.
 - ✓ TREMO Carrier, the narrow-track winter professional. Clears, and cuts snow and spreads even in the narrowest corners.

Masters of the road

Manoeuvrable, compact and ready at all times. A Multicar is at home on all roads and bicycle paths of your town. With dimensions of approx. 1.60 m width (TREMO Carrier only 1.32 m) and approx. 2.20 m height, FUMO, M 26 and TREMO Carrier even fit on bicycle paths and through narrow archways. With their powerful engines, they join unobtrusively the flowing traffic. With their powerful brakes, they stop within the shortest time. And with approx. 5 m turning radius, they turn around the narrowest corners.

With the 1800 l tank of the TREMO Carrier, you are not dependent on a stationary water supply.

FUMO, outfitted for cleaning, brings 60 l/min onto the road with the 140 bar spraying bar.

The M 26's generator supplies current for operating equipment (e.g. capping saw and bolt-driver).

With an operating pressure of up to 300 bar, you control the volume flow for the suction road cleaning machine comfortably from the centre console.

Washing marker posts and crash barriers with FUMO. Up to 30 kW hydraulic power drive implements in a powerful manner.

TREMO, the implement carrier, in extremely narrow sweeping use.

- Road tips:**
- ✓ Multicar quickhitch system. Three attachment areas and standardised attachment points: At the front, top and rear.
 - ✓ FUMO and M 26: High loading capacity. With an additional trailer, you move various materials in a simple and fast manner.
 - ✓ TREMO Carrier, the cleaning professional. Whether water tank or receiving container. This compact road sweeper has a capacity of up to 2 m³.

Sweeping, washing, maintenance

The summer time begins here

For some, it means quality of life, for others, it means a lot of work: Summer. Arranging, planting, cutting, mowing, mulching, watering, chopping and, at the same time, transporting water, sand, soil or tree cuttings. Good, when your partner is a real multi-talent and simultaneously drives implements and transports heavy loads. In other words, a genuine Multicar.

FUMO excels also where there are no roads with 4x4 all-wheel drive, excellent off-road capability and a 3-way dumper with 1.3 m³ loading volume.

With three-circuit hydraulics and hydrostatic drive, FUMO with the flail mower head mows slopes and embankments with precision.

Up to 6.6 m³ leaves are vacuumed by the M 26 with its long wheelbase into its crate attachment.

Independent from a stationary water supply, you water with the M 26 also with only 1.60 m clearance.

The TREMO implement carrier with commercial grass and leaf collection system.

Mowing and cutting bushes

Shredding tree cuttings directly on site. The M 26 drives the shredder with its strong universal hydraulics.

Comfortable working at a height of 21 m. FUMO with working platform with 400° turning range and hydraulic drive.

- Implement carrier tip:**
- FUMO, the implement carrier with transport function.**
- ✓ Three attachment areas
 - ✓ More than 100 possible implements
 - ✓ Conversion with a few turns of the hand
 - ✓ Easy and precise operation of the implements
 - ✓ Excellent driving and working characteristics
 - ✓ Crawler gear switched on by pressing a button
 - ✓ Compact at the outside, comfortable inside

To and fro and away

Especially for the tasks that do not have to be performed every day, you will discover the many talents of the Multicar family. Via the hydraulic connections at the front and rear you drive, for example, many implements for repair and maintenance completely independent of stationary current sources. The attachment ball & socket quick-change system is your docking system for nearly a hundred possible special attachments. In addition, the many transporter attachments again supplement the spectrum decisively.

Lifting of sewer cover and hydraulic cleaning of catch basin. With FUMO, you are quickly ready to start.

Only 1.59 m wide, 2.24 m high, but up to 8 m long. The M 26 with longmaterial dolly.

FUMO makes space: Its container takes up to 4.9 m³ and hydraulically compresses with a ratio of 5:1.

Clearing, picking up, skipping and much more

With 140 bar water pressure, FUMO rinses dirt out of the sewer.

With up to 3.1 m³ loading volume, the M 26 with long wheelbase and trailer transports on and off the road.

Thanks to its sturdy design and hydraulics, the M 26 with hook lift, lifts up to 2.5 t by itself in a powerful manner.

FUMO brings a team of up to 5 persons in the double cab comfortably to their destination.

With single-circuit hydraulics and a payload of up to 2.3 t, the M 26 with skip loader also disposes of material in narrow driveways and inaccessible building sites.

Transport tip:

M 26: The special transporter

- ✓ Powerful turbodiesel engine with 74 kW / 100 HP
- ✓ Maximum torque of 270 Nm
- ✓ With three-way tipper or skip loader
- ✓ Robust and manoeuvrable
- ✓ 4x4 all-wheel drive with best traction, also in the terrain

Depending on variant and equipment

- ✓ Overall weight up to 4.8 t
- ✓ Payload up to 2.6 t
- ✓ Braked trailer load up to 3.5 t
